"Best upgrade ever!"

You will never add a smaller upgrade that will get you bigger attention to your home! These are unique eye candy no matter the style of your home! So very happy I found them, it changed the look of garden gate, fence and wood trim in kitchen into something special. ♡♡

Categories are indicated by an easy to distinguish **Outer Circle** around a **Typical Installation Graphic** of the product and the header bar on each page.

Typical Installation Graphics are the most common installation configuration, but not limited to. **Note:** This is how the product has been tested. OZCO products are versatile and can almost always be used in a variety of projects and scale.

10 REASONS OZCO is the GREATER Choice In Building Materials

PATENTS

- OZCO has been granted 10 US patents on its products with more pending.
- OZCO invests in protecting its intellectual property.

SOCIAL PROOF ★★★★★

- Check out our 100's of product reviews, across industry leading sources print & digital.
- Thousands of DIY and Pro submitted project pictures, posts and engagement.
- Featured on several popular HGTV & DIY home improvement shows.

COST SAVING

- Custom cut steel is expensive in part to the time consuming manufacturing process and simply doesn't last as long.
- What is the cost per pound? Take the cost/weight and you will quickly see that OWT hardware has the lowest cost per pound.
- Don't pay more for less — With OZCO products that is never the case.

ADJUSTABLE

- Lumber dimensions vary tremendously — from rough cut, smooth, reclaimed and so on, combined with the many types of species utilized with OWT connectors.
- Other connectors on the market require bending of the brackets or the size of material to be known before placing orders. Neither option is ideal — OWT connectors are the answer offering truly adjustable on-site installation with ease.
- A complete and tight connection produces the highest level of strength and performance in any installation.

G-PC

HOT DIPPED GALVANIZED

- Not all galvanized is created equal, pre-galvanized steel does not perform as well as HDG.
- Galvanizing after production ensures all areas of the steel is uniformly coated with zinc.
- Same process used for national highway guardrails, an area subjected to some of the harshest environmental conditions.

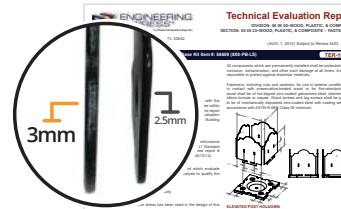

POWDER COATED

- OWT hardware features high grade exterior powder coating.
- PC performs better than liquid paint typically used by steel fabricators.
- All of the OZCO black powder coated hardware is truly uniform providing consistency & performance for the entire project.

inches mm

THICKER STEEL

- The thicker the steel is the stronger the connection will be.
- OWT steel thickness is scaled to be more pleasing to the eye.
- Pays homage to the history of this type of timber construction.

lbs kg

TESTING / REPORTS

- OWT hardware is not only attractive but it is also structural.
- We could manufacture our products for a lower cost but our goal is to make our products perform above industries standards.
- Drawings and load data listed on ARCAT for easy access.

●

KITS & PACKAGING

- At OZCO we are builders too, so whenever possible we include the necessary hardware to keep your list short, save time & money.
- Well packaged to remain in excellent condition from the store to the job-site.
- Packaged in job sized quantities for DIY and Pro.

●

TIMBER BOLTS & SCREWS

- OWT Timber Screws feature performance with strength that is second to none — in a wide range of lengths for all types of projects.
- Screws can be used successfully when the force is predominantly shear load.
- Don't forget to use our Heavy Duty Washer on wood to wood connections for added strength and style.

About Our Icons

Each icon below has a detailed description and each is a commonly used term throughout the various OZCO product brands. At any point in this catalog you can refer back to this page for an icon's meaning. These icons are used on product packaging to help identify key features.

ACQ	Approved to Use With ACQ Treated Lumber Aprobado para su uso con ACQ Madera Mratada

OWT LITE

Ornamental Wood Ties
available in Laredo Sunset & Ironwood

more buying

POWER

Like the OWT Post base, the OWT Lite is beautifully designed and features some of the same patented features as the Original. It also features a 1 inch offset to meet international residential building code for installation using non-rot-resistant lumber. OWT-Lite products are simplified versions original OWT products designed to meet minimum load requirements, and offered at a lower price point.

I'm so happy I found these fasteners for our pergola. I was searching online for something with a little more panache than galvanized hangers and fasteners and I found these. They're heavy duty, easy to assemble and they increase the value and look of our pergola. I couldn't be happier to have these attached to our house. !! Gary S. ~ Verified Buyer

Project #309

RAFTER CREATE
SEAMS *curve* APPEAL

The OWT Rafter Seam™ is a specialty connector that is the first of its kind. Although it is useful for many types of connections one of the most common is to join rafters for curved top pergolas. A curved top structure is a real conversation piece, but conventional construction techniques have major limitations.

So how does it work? Start by cutting the rafters into the shape that you would like. Position the two boards tightly together, then position Rafter Seam™, using our stamped hash marks to align the seam. Install screws on both sides of the joint. Then tighten the bolt to snug the two pieces together. Repeat this process for the other side of the rafter with the bolt facing the opposite direction.

!! 2" Rafter Clips, Post Bases

We recently installed a new arbor/patio cover in our back yard. We heard about the OZCO line through a friend and thought we would try it out. We were on the fence about trying it due to the added costs, but we decided to add them to our patio based on good reviews from some past clients. Adding these to our patio was the **BEST** decision we made! They took our patio from "nice" to "amazing" and a real show-stopper. Not only do they add reinforced structure, but they look great and really add an extra touch to take your patio to the next level. We've already received so many compliments and I would highly recommend investing in the parts when you build your patio. The hardware looks great and we could not be happier. !!

!! Great Truss System

I used the Truss Fan Base with Ironwood Truss Accents and 1/2" Timber Bolts to make trusses for a car port. These product made this project so much easier and look great. The fan base is both strong and good looking. The accent pieces give the trusses a finished look. The powder coat finish on all the parts should look good for a long time. !!

!! Hex Cap Nuts

I used a number of the products from this line on a recent project and was very pleased to not only find the products, pergola hardware is scarce, but also to find such a well-engineered and easy to use line of hardware. On the first project I used over \$1,000 of this OWT product line to build a 10' x 30' cedar pergola and am about to start another project that will require as much or more. These nuts were extras I thought I might need. !! S. Bruce ~ Dallas, TX

★★ OWT Timber Bolts!

Beautifully constructed and easy to install. They are uniquely constructed to fit a range of widths. I'd highly recommend them when you need both that 'finished' look. ★★ John M. ~ Verified Buyer

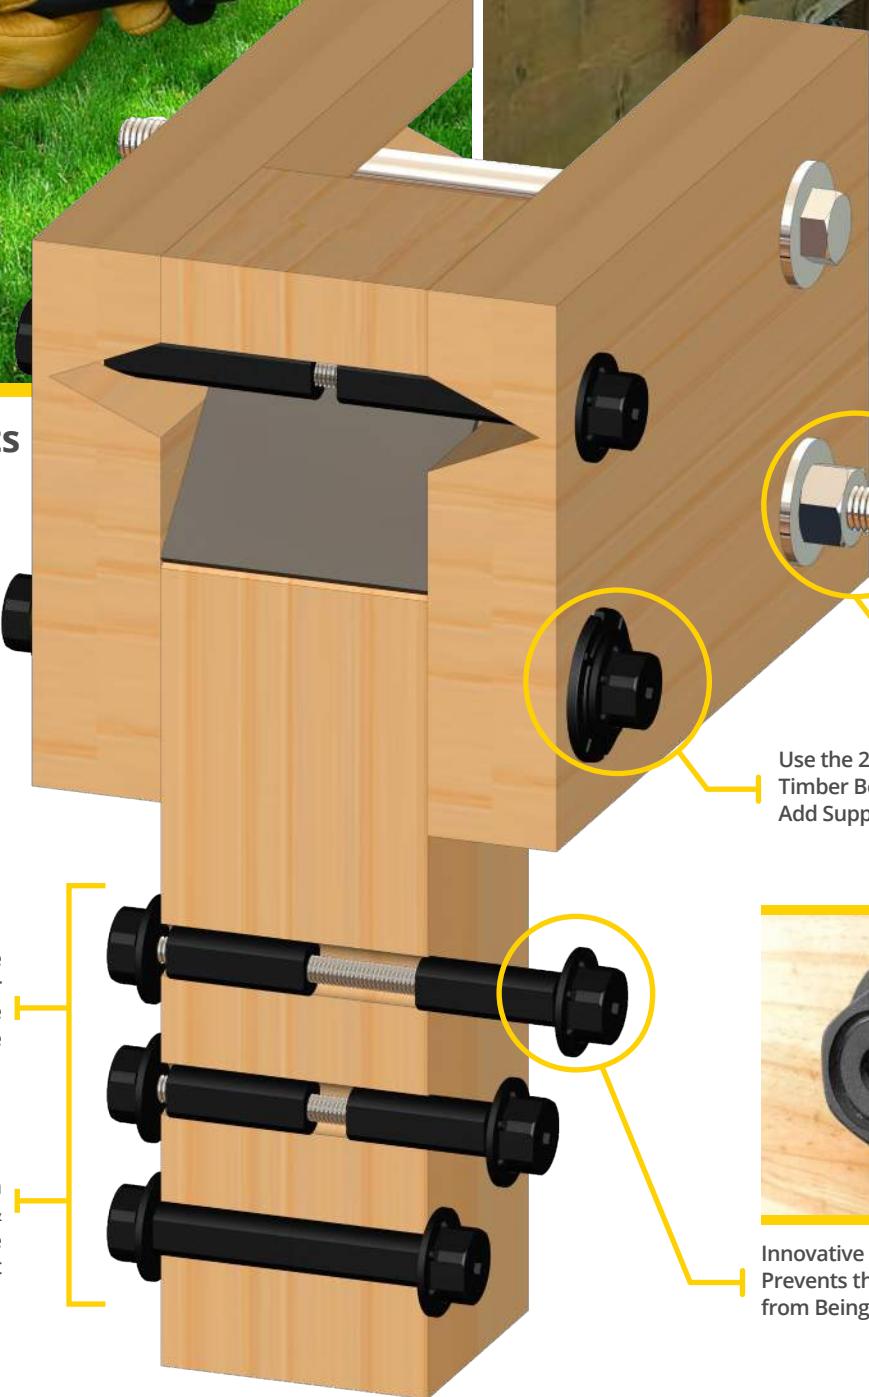

OWT Timber Bolts

Each Bolt Size Adjusts Over 2" for the Perfect Size Every Time

Inserts Like a Traditional Bolt & Tightens From the Inside Out

No Trimming of Unsightly & Potentially Dangerous Bolt Ends

Use the 2" Heavy Duty Timber Bolt Washer to Add Support & Impact.

Innovative Hex Cap Nut Design Prevents the Outside Coating from Being Marred or Damaged

- Corrosion Resistant Coatings & Materials for Long Lasting Performance
- Attractive Design for Visible Connectors. A Perfect Finish to Any Project
- Washer Built Into the One Piece Hex Cap Nut

OWT Timber Screws are heavy duty fasteners specifically designed for wood to wood connectors indoors or outdoors including contact with ACQ treated lumber. No pre-drilling is required when proper end and edge distances are maintained for most construction lumber materials.

Full product specifications available on OZCOBP.com. A design professional should be consulted when making critical connectors to ensure the locations and quantity of fasteners meets local and national code requirements. Not recommended for salt water applications.
